December 5, 2003

The attached report represents a consolidation of Reports of Condition filed by state-chartered banks with the Missouri Division of Finance as of September 30, 2003, and a comparison with the statements filed one year earlier.

Also included is a comparison of financial statements of state-chartered and national banks.

During the previous twelve months, the number of state-chartered banks and trust companies declined by four from 313 to 309. Six banks merged into other Missouri state-chartered banks, one merged into a Missouri national bank and one merged into an out-of-state bank. One nondeposit trust company merged into another Missouri nondeposit trust company. There were three new bank charters (one a former national bank and one a former federal savings bank) and two new nondeposit trust charters granted.

Assets in state-chartered banks totaled \$51.7 billion on September 30, 2003, an increase of 14.9 percent from one year earlier. Deposits were \$41.6 billion, up 13.0 percent. This growth was aided by a bank merger during the first quarter of 2003 that increased total assets by over \$3 billion.

Total loans were \$35.9 billion on September 30, 2003, up 14.7 percent.

The equity capital ratio increased to 10.37 percent. Primary capital, which includes the allowance for loan and lease losses, was also up, to 11.24 percent. These increases were influenced by a large rise in intangible assets. The tangible equity capital ratio was down slightly to 9.04 percent.

Net income in state banks was up 15.0 percent for the first nine months of 2003. Return on assets among state-chartered banks was 1.18 percent, which was the same in 2002.
